

QUALITY POLICY

PlastoMer Swedens quality policy is that with the customer's wishes and requirements in focus manufacture and deliver the mud flaps, car mats or other products within our expertise that is requested.

In addition to this, we will mediate value by:

- we see all subsequent links as customers - both internally and externally,
- we strive to do right from the beginning,
- we are responsive and willing to learn and improve,
- we work structured using quality systems according to SS-ISO9001 and regularly establish and evaluate our quality goals,
- our products comply with applicable laws and directives.

ENVIRONMENTAL POLICY

PlastoMer Sweden will with the customer's wishes and requirements in focus manufacture car mats or other products within our expertise that is requested.

The business will be conducted with the quest that in long-term minimize its environmental effect.

We will achieve this as far as it's economical, technical, work environment and environmentally possible, by:

- choose options with low environmental impact in the design and purchasing stage,
- continuously seek improvements from an environmental point of view to existing systems and products,
- prevent contamination in the design stage of new products so the raw material and energy consumption is minimized in the manufacturing processes,
- the transition to more environmentally friendly machines, products and consumables are made in a natural way,
- inform and educate our employees to increase environmental awareness,
- the result of the environmental work must, when possible, be measured and form the basis for improvements of processes, products, organization, guidelines and routines,
- our environmental policy is available to our investors and the public,
- work and follow the applicable regulations and environmental legislation that our organisation contain.
